EVERY SEED STARTS A STORY

SEED GUIDE 2025

ALLIANCE SEED

Every seed starts a story.

A seed holds the promise of a successful harvest each year. From the first day of planting, as you watch your crop grow and navigate the challenges of weather, to the final load from the last field, it all begins with the seed you choose. Growers like you trust us to guide your choices, providing the expertise and information needed to match the right seed to your farm's unique potential.

Years of research in yield, disease resistance, maturity, and grain quality come together to create a lineup of top-performing seeds. Exceptional harvests start with unparalleled potential, and we ensure that potential is realized by partnering with the best seed growers and the most dedicated retailers to deliver the highest quality seed.

Our varieties are designed to produce high-yielding, profitable crops. As a company owned by Canadian grain leaders, we have unique insight into global market trends, ensuring you're growing what customers want.

This seed guide is the start of the next chapter of your operation.
Let's start writing.

ALLIANCE SEED CDC ENVY

CDC Envy is an exciting new CWRS that is early maturing, high yielding semi-dwarf with good standability.

CERTIFIED SEED WILL BE AVAILABLE FALL 2024.

CDC ENVY FEATURES:

- Yields of 114 % of the mean of check cultivars in the 2018-2020 Parkland Coop Trials
- Early maturity
- Semi-dwarf
- Good lodging resistance
- Excellent disease package

CDC ENVY AGRONOMIC INFORMATION ¹							
	Yield				Protein (%)	Sprout	Maturity (days)
	MB (bu/ac)	SK Area 1 & 2	SK Area 3 & 4 (As a % of Check)	AB Overall			
AAC Brandon (check)	74	100	100	100	14.3	P	101
CDC Envy	73	97	99	98	13.9	F	99

For more info

ALLIANCE SEED AAC REDBERRY

AAC Redberry distinguishes itself as the industry standard for an early maturing, high yielding CWRS with high yields and good standability. It has built a reputation for maintaining quality even through challenging harvest conditions.

AAC REDBERRY FEATURES:

- Early maturity, in field results as much as 1 week earlier than other CWRS varieties
- High grain protein, HVK, and test weights, even under adverse harvest conditions
- High yield potential, 115 % of checks through registration trials
- Semi-dwarf

AAC REDBERRY AGRONOMIC INFORMATION ¹

	Yield				Protein (%)	Sprout	Maturity (days)
	MB	SK Area 1&2	SK Area 3&4	AB Overall			
	(bu/ac)	(As a % of Check)

ALLIANCE SEED AAC LEROY VB

AAC LeRoy VB CWRS has the amazing combination of high yields, disease resistance and midge tolerance, as well as consistent harvest quality that makes AAC LeRoy VB a go-to variety for farmers across western Canada.

AAC LEROY VB FEATURES:

- AAC LeRoy VB raises the standards for CWRS yield with higher yields than many comparable varieties
- Semi-dwarf with strong standability make AAC LeRoy VB a great choice for all wheat growers across the prairies
- Excellent disease resistance, including MR for FHB, MR for Leaf Rust, Stem Rust and Stripe Rust
- Wheat midge resistance from Sm1 gene

AAC LEROYVB AGRONOMIC INFORMATION ¹							
	Yield				Protein (%)	Sprout	Maturity (days)
	MB (bu/ac)	SK Area 1&2	SK Area 3&4 (As a % of Check)	AB Overall

AAC LeRoy VB	76	98	102	100	14.1	G	100

For more info

ALLIANCE SEED AAC ELIE

AAC Elie continually proves to be a superior strong strawed semi-dwarf CWRs variety with good resistance to fusarium head blight. AAC Elie growers repeatedly comment on its high yields, good grade results and consistent performance across all environments and production areas.

AAC ELIE FEATURES:

- High grain yield
- Short strong straw
- High test weight
- Disease resistance

AAC ELIE AGRONOMIC INFORMATION ¹							
	Yield			Protein (%)	Sprout	Maturity (days)	
	MB (bu/ac)	SK Area 1&2	SK Area 3&4 (As a % of Check)				AB Overall
AAC Brandon (check)	74	100	100	100	14.3	P	101
AAC Elie	72	99	99	103	14.3	F	102

Hard Red Spring Wheat

For more info

ALLIANCE SEED AAC WEYBURN VB

AAC Weyburn VB proves you can have it all; a high yielding durum variety with great standability and disease resistance, along with the protection of midge tolerance and stem sawfly resistance.

AAC WEYBURN VB FEATURES:

- High yields, outyielding CDC Precision in the 2023 ABRVT and SKVPG trials
- Midge tolerance and stem sawfly resistance
- Great standability
- Medium height

AAC WEYBURN VB AGRONOMIC INFORMATION ²							
	SK Area 1&2	SK Area 3&4	AB Overall	Lodging	Sprout	Maturity (days)	Height (cm)
	(As a % of Check)

AAC Weyburn VB	111	110	107	F	F	102	88

For more info

ALLIANCE SEED CDC PRECISION

CDC Precision CWAD continues to raise the bar for durum in western Canada with its package of yield and agronomic characteristics that durum growers demand and is the variety to beat for many producers in the CWAD growing regions of western Canada

CDC PRECISION FEATURES

- CDC Precision sets the bar for yields in durum with very high consistent yields across all durum growing areas
- Strong standing
- MR or R rated for all rusts
- FHB resistance similar to Brigade

CDC PRECISION AGRONOMIC INFORMATION ³						
	SK Area 1&2	SK Area 3&4	Lodging	Sprout	Maturity (days)	Height (cm)
	(As a % of Check)					
Strongfield (check)	100	100	P	F	101	87
CDC Precision	106	109	F	G	102	89

For more info

ALLIANCE SEED CDC EVIDENT

It will be (CDC) Evident that durum growers will choose this variety to grow as soon as possible. CDC Evident is the newest, highest-yielding CWAD currently registered and looks very strong in all durum growing areas.

CERTIFIED SEED LAUNCH IS SCHEDULED FOR SPRING 2026

CDC EVIDENT FEATURES:

- High grain yield; yielding higher than all check cultivars in the Western Canadian Durum Coops 2021-2022
- Disease resistance; R to leaf, stem and stripe rust and common bunt
- Excellent end use suitability

CDC EVIDENT AGRONOMIC INFORMATION³

	SK Area 1&2		Lodging	Sprout	Maturity (days)	Height (cm)
	SK Area 3&4

ALLIANCE SEED CDC ENDURE

CDC Endure sets the benchmark for yield and quality in oats across Western Canada and is the variety that growers will choose for many years.

CDC ENDURE FEATURES:

- Top yielding oat variety across all of Western Canada outyielding AC Morgan and CS Camden in 2023 MCVET, SKVPG and ARVT trials
- Strong standability
- Earlier maturity than CS Camden
- High test weights
- Consistently high Beta-glucan content

CDC ENDURE AGRONOMIC INFORMATION ¹						
	Yield				Lodging	Crown Rust
	MB	SK Area 1&2	SK Area 3&4	AB Overall		
	(bu/ac)	(As a % of Check)

ALLIANCE SEED ORe RUMINATOR

ORe Ruminator provides growers a versatile oat for inclusion in a producers feed program, in a cover crop or multi-crop system with an erect growth structure, exceptional tillering capacity and lodging resistance.

CERTIFIED SEED LAUNCH IS SCHEDULED FOR FALL 2026.

ORE RUMINATOR FEATURES:

- Large wide leaves produce high biomass and high-quality forage potential.
- Very good lodging resistance
- Long days to heading and maturity.
- Very good TKW and percent plump
- Resistant to Smut
- VUA agreement

ORE RUMINATOR AGRONOMIC INFORMATION ⁷						
	KG/AC	Moisture	Crude Protein (%)	TDN (Total Digestible Nutrients) (%) (on DB)	NDF (Neutral Detergent Fibre) (%)	Metabolizable Energy for Cattle (Mcal/kg) (on DB)
Haymaker Oat	4966	0.65	11.00	56.12	60.4	2.37

ALLIANCE SEED AAC PERFORM

AAC Perform CPSR; the name says it all. High yield potential, excellent standability and a great disease package, this variety has it all. Growers will be thrilled with (AAC) Perform.

CERTIFIED SEED LAUNCH SCHEDULED FOR FALL 2025.

AAC PERFORM FEATURES:

- 106% of AAC Foray, 112% of AAC Penhold and 122% of Carberry
- Semi-dwarf height, 4 cm shorter than AAC Foray
- Excellent straw strength
- R to leaf rust, stripe rust and stem rust

AAC PERFORM AGRONOMIC INFORMATION ¹							
	Yield				Protein (%)	Lodging	Maturity (days)
	MB	SK Area 1&2	SK Area 3&4	AB Overall			
	(As a % of Check)						
AAC Brandon (check)	74	100	100	100	14.3	G	101
AAC Perform	80	111	111	105	12.7	VG	102

For more info

ALLIANCE SEED AAC VORTEX

GET READY FOR THE POWER OF AAC Vortex. AAC Vortex combines the power of high grain yield, excellent winter hardiness, short strong straw, medium maturity, excellent disease resistance and grain quality into a variety that will expand your expectations of a winter wheat

AAC VORTEX FEATURES:

- Higher grain yield than all of the checks in Alberta and in the Parkland regions of Saskatchewan and Manitoba
- Excellent winter survival
- Shorter than Emerson with excellent lodging resistance
- Excellent disease package with R ratings for Leaf Rust, Stem Rust, and Stripe Rust and MR for FHB

AAC VORTEX AGRONOMIC INFORMATION ¹						
	Yield				Lodging	Winter Hardiness
	MB	SK Area 1&2	SK Area 3&4	AB Overall		
	(As a % of Check)					
Emerson (check)	83	100	100	97	VG	VG
AAC Vortex	87	98	106	105	VG	VG

For more info

ALLIANCE SEED AAC ABERDEEN

AAC Aberdeen is a top yielding, medium maturity, semi-leafless, medium sized, yellow pea variety with leading standability and excellent resistance to powdery mildew.

AAC ABERDEEN FEATURES:

- Highest yielding yellow pea in provincial trials
- Excellent standability
- Medium seed size (250 g)
- I rating for Fusarium Wilt

AAC ABERDEEN AGRONOMIC INFORMATION ¹							
	Yield				Protein (%)	Relative Maturity	Lodging
	MB	SK Area 1&2	SK Area 3&4	AB Overall			
	(As a % of Check)

ALLIANCE SEED CDC ENGAGE

The next yield Engagement is here. CDC Engage boasts enhanced yields, improved protein content and reduced seed coat breakage over current checks.

CERTIFIED SEED LAUNCH IS SCHEDULED FOR FALL 2026

CDC ENGAGE FEATURES:

- Improved yield (104%) compared to the mean of yellow checks - AAC Lacombe and CDC Amarillo
- Greater seed protein concentration than the checks
- Low seed coat breakage percentage, less than checks
- Good lodging resistance similar to checks

CDC ENGAGE AGRONOMIC INFORMATION ⁵					
	Yield (% of CDC Amarillo)	Days to Maturity	Seed Weight (g/1000)	Seed Coat Breakage (%)	Protein (%)
CDC Amarillo (check)	100	91	226	16.8	22.7
CDC Engage	104	92	233	3.3	23.8

Yellow Peas

VUA

ALLIANCE SEED CDC 5845

CDC 5845 comes to Alliance Seed from the LimaGrain/SPG collaboration. CDC 5845 will provide growers with a boost in yield over typical yellow pea checks along with improved protein content and an improved seed coat breakage.

CERTIFIED SEED LAUNCH IS SCHEDULED FOR FALL 2026.

CDC 5845 FEATURES

- High yield; increased yield at 104% of average of the checks
- Improved seed coat breakage compared to checks
- Protein 0.9% vs the CDC Amarillo check
- VUA Agreement

CDC 5845 AGRONOMIC INFORMATION ⁵

	Yield (% of CDC Amarillo)	Days to Maturity	Seed Weight (g/1000)	Seed Coat Breakage (%)	Protein (%)
CDC Amarillo (check)	100	91	226	16.8	22.7
CDC 5845	104	92	236	5.6	23.6

Variety Use Agreement Platform

WHY?

As agriculture evolves, increased investment and collaboration in the research and development of new seed varieties is essential across the value chain. Everyone benefits from improved seed varieties with higher yields, better quality, enhanced disease resistance, stress tolerance, and increased profits.

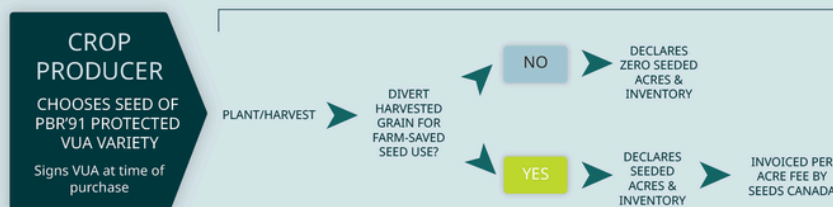

WHAT?

The Variety Use Agreement (VUA) Platform is a web-based tool designed to support and boost plant breeding investment. It facilitates cost-effective royalty collection for specific PBR'91 varieties, as determined by plant breeders and their distributors.

HOW?

Seeds Canada administers the VUA Platform on behalf of the industry. Based on seed use declarations, producers are invoiced and then variety use fees are collected and redistributed to the plant breeders.

REPEAT PROCESS EACH YEAR

Yellow Peas

ALLIANCE SEED AB CATTLELAC

AB Cattlelac is a top-ranked semi-smooth awned barley with high forage yield, good lodging resistance, excellent grain yield, and strong disease resistance, making it the luxury choice for barley growers and their operation.

AB CATTLELAC FEATURES:

- Excellent forage yield throughout registration trials: 105% of AC Ranger
- Grain yields similar to other high yielding feed barley varieties
- High cow carrying capacity
- Improved lodging over AC Ranger
- Semi-smooth awned, 6 row

AB CATTLELAC AGRONOMIC INFORMATION ⁴						
	Yield				Forage Yield (As a % of check)	Awn Type
	MB	SK Area 1&2	SK Area 3&4	AB Overall		
	(bu/ac)	(As a % of Check)

ALLIANCE SEED AS MANON

AS Manon feed barley comes with remarkable performance across yield environments, early maturing great standability and excellent test weight.

AS MANON FEATURES:

- 2 row feed barley
- Beat all key checks across geographies
- Early maturing
- Excellent standability
- Excellent disease tolerance
- Rough awn
- Excellent test weight

AS MANON AGRONOMIC INFORMATION ⁶					
	Yield (bu/ac)	Maturity (days)	Lodging	Height (cm)	Test Weight (kg/hl)
AB Cattlelac	83	89	VG	88	66.2
AS Manon	94	85	VG	85	67.4

For more info

ALLIANCE SEED AS LAFLEUR

A new 2 row feed barley offering from Alliance Seed. Offering Western Canadian barley growers' consistent performance, excellent lodging resistance and short stature.

CERTIFIED SEED LAUNCH IS SCHEDULED FOR FALL 2026.

AS LAFLUER FEATURES:

- 2 row feed barley with consistent performance across yield environments
- Shorter stature with very good lodging resistance
- Strong test weight
- Rough awned
- Excellent test weight
- Very good disease tolerance

AS LAFLUER AGRONOMIC INFORMATION ⁶					
	Yield (bu/ac)	Maturity (days)	Lodging	Height (cm)	Test Weight (kg/hl)
AB Cattlelac	83	89	VG	88	66.2

Feed Barley

Certified Seed: Choose Quality from the Start

Farming is challenging but it is the economic backbone of our country, and seed is the foundation of our food system. Selecting the right seed is one of a farmer's most important decisions. That's why it's essential to choose seed you can trust, and choosing Certified seed gives you the edge.

Certified seed gives farmers assurance that their crops were grown from seed that followed national standards and passed third-party certification to ensure its varietal identity, purity, quality, and performance. They get the most innovative product on the market.

Learn more at:

ChooseCertifiedSeed.ca

Canadian Certified seed is produced for farmers by farmers.

The Value of Certified Seed

- Foundation of quality grain and food
- Offers the promise of genetic identity, varietal purity, and performance
- Delivers the latest genetics, increased yields, regional adaptation, improved disease resistance, and free of weeds and other seed varieties
- Fully traceable and delivers field-to-fork traceability for consumers
- Provides trust and reliability

Certified Means Certainty

Every step of the Certified seed production process is rigorously monitored to ensure top-quality results. That's the *Certified Seed Advantage*.

OT 2148 Milling Oat

A milling oat that packs a punch. OT2148 is a new high yielding oat that offers early maturity, high protein and a good beta glucan content. With a best-in-class disease package including resistance to crown and stem rust. Breeder seed available in 2025.

LAR20-25760 CPSR

Looking for a CPSR variety with midge tolerance, high yields and great standability? Look no further than LAR20-25760. Offering early maturity, resistance to stem rust and MR rating for bunt. We are thrilled to bring LAR2-25760 to growers.

VUA

LAR20-25463 CWRS

LAR20-25463 is a new CWRS that boasts exceptional yields, a solid disease package and good milling quality. LAR20-25463 is the smart choice for every farmer aiming for success.

VUA

8630-1-h2-11 CL

Get ready for the ultimate red lentil 8630-1-h2-11 CL with yields up to 119%, thicker seed size, imidazoline tolerance, and standing 5 cm taller than CDC Maxim, this new variety is set to revolutionize your harvest. Don't miss out on the next big thing in red lentils coming soon!

VUA

ALLIANCE SEED CDC 7358CL

Introducing, CDC 7358 CL, a new small green lentil that we are very excited to be adding to our already stellar line up of varieties. With improved yield of 111% of the check CDC Imvincble and the added benefit of Imidazoline tolerance. CDC 7358 CL will be the one to beat.
